

Radio frequency engineering

Editor: J. Miles

CAS - CERN Accelerator School : Radio Frequency Engineering
8 - 16 May 2000 , Seeheim, Germany

Review of theory I, II, III

T. Weiland, M. Krasilnikov, R. Schuhmann, A. Skarlatos and M. Wilke [1](#)

High-frequency non-ferrite cavities

J. Le Duff [47](#)

Basic concepts I and II

H. Henke [65](#)

Improvements in cavity construction techniques

W. Wuensch [102](#)

Review of RF power sources for particle accelerators

R. Carter [107](#)

Low-level RF systems for synchrotrons. Part I: The low-intensity case

P. Baudrenghien [146](#)

Low-level RF systems for synchrotrons. Part II: High intensity-compensation of beam-induced effects

P. Baudrenghien [175](#)

High-power RF transmission

R. Cooper and R. Carter [210](#)

Cavities with a swing

A. Schnase [236](#)

Servo control of RF cavities under beam loading	<u>273</u>
<i>A. Gamp</i>	
RF gymnastics in synchrotrons	<u>290</u>
<i>R. Garoby</i>	
Radio-frequency quadrupole linacs	<u>305</u>
<i>A. Schempp</i>	
Superconducting cavities	<u>315</u>
<i>G. Bisoffi</i>	
Choice of RF frequency	<u>336</u>
<i>W. Pirkl</i>	
H-type linac structures	<u>351</u>
<i>U. Ratzinger</i>	
Recent developments in the use of accelerators for radiation therapy	<u>381</u>
<i>E. Pedroni</i>	
Stochastic cooling and related RF components	<u>400</u>
<i>F. Nolden</i>	
Practical instructions for the RF and microwave measurement tutorial	<u>421</u>
<i>F. Caspers and G. Hutter</i>	
Superconducting electron linear accelerators and recirculating linacs	<u>440</u>
<i>H.-D. Gräf and A. Richter</i>	
List of participants	<u>472</u>
